Preparatory Steps Before Installation

- Assessing the Space and Measuring Accurately

Accurate measurements are foundational. Begin by measuring the existing opening or the space designated for the new door:

- Width: Measure at three points—top, middle, and bottom—to account for any wall irregularities. Use the smallest measurement as the official width.
- Height: Measure from the floor to the header at multiple points, again noting the smallest measurement.
- Depth: Check the thickness of the wall to ensure the new door frame fits snugly.

Tip: Always record measurements in multiple units (e.g., inches and centimeters) for precision.

- Inspecting the Opening and Framing

Ensure the rough opening is structurally sound, level, and plumb:

- Check for obstructions: Remove any debris or old hardware.
