What is Algorithmic Art?

Definition of Algorithmic Art

Algorithmic art, also known as generative art, involves creating artworks through the use of algorithms—sets of rules or instructions that generate visual content. Unlike traditional art, where the artist directly manipulates materials, algorithmic artists design procedures that produce images, animations, or even interactive experiences automatically.

Characteristics of Algorithmic Art

- Procedural Generation: Artworks are created based on algorithms that can produce a wide array of visual variations.
- Reproducibility: The same algorithm can generate similar or identical artworks, ensuring consistency or controlled variation.
- Complexity from Simplicity: Simple rules can often lead to intricate and captivating visuals.
- Interactivity: Some algorithmic art incorporates user input, enabling dynamic and personalized creations.

Examples of Algorithmic Art

- Fractal images such as the Mandelbrot set

- Computer-generated abstract art
- Interactive visualizations and installations
- Data-driven visual representations
