Sample Test Questions for FMCSA Medical Examiner: Examples and Analysis

Below are illustrative sample questions, each accompanied by explanations to highlight the rationale and the knowledge assessed.

Question 1:

Which of the following conditions is generally considered a disqualifying neurological disorder for commercial driver certification?

- A) Controlled epilepsy
- B) History of stroke with residual weakness
- C) Migraines without neurological deficits
- D) Recent concussion with full recovery

Analysis: The correct answer is B) History of stroke with residual weakness. The FMCSA generally disqualifies drivers with residual neurological deficits that impair ability to operate a vehicle safely. Controlled epilepsy (A) may not automatically disqualify if controlled, and migraines (C) without neurological deficits are usually not disqualifying. Recent concussion (D) may require a temporary disqualification until full recovery.

Question 2:

When assessing a driver with elevated blood pressure, which of the following is the minimum systolic reading that warrants referral for further evaluation?

- A) 140 mm Hg

B) 150 mm Hg

C) 160 mm Hg

D) 180 mm Hg

Analysis: The correct answer is A) 140 mm Hg. According to FMCSA standards, a systolic BP of 140 mm Hg or higher requires further evaluation and management to determine fitness for duty.

Question 3:

Which documentation is required to be completed during each medical examination?

A) Medical Examiner's Report Form (MCSA-5875)

B) Driver's medical history form

C) State driver licensing application

D) Insurance verification form

Analysis: The correct answer is A) Medical Examiner's Report Form (MCSA-5875). This form documents the exam findings and certifies the driver's fitness. The other options are not standard documentation for the medical exam.

Question 4:

An examiner notices a driver has a visual acuity of 20/50 in each eye with correction. Is this acceptable under FMCSA standards?

A) Yes, since visual acuity with correction meets the standard

B) No, visual acuity must be 20/40 or better in each eye

C) Yes, if the driver passes a visual field test

D) No, drivers must have 20/20 vision without correction

Analysis: The correct answer is A) Yes, since visual acuity with correction meets the standard. FMCSA standards require at least 20/40 vision in each eye with correction, so 20/50 with correction is acceptable.
